Education

- Fullstack Web & Mobile Development
PT. Dumbways Indonesia Teknologi
(August 2023 - December 2023)
- SMA Multimedia Skoba Madani
(August 2019 – July 2022)

Certificates

- PT. Dumbways Indonesia Teknologi
(August 2023 - December 2023)
 - [Fullstack Web and Mobile Development](#)
- Dicoding Indonesia
(2022-2023)
 - [Learning the Basics of JavaScript Programming](#)
 - [Learning the Basics of Web Programming](#)
 - [Learning to Create Web Applications with React](#)
 - [Learning Frontend Development for Beginners](#)

About Me

I'm fresh graduated from PT. Dumbways Indonesia Teknologi with expertise in web and mobile development using JavaScript, Typescript, React JS, and React Native. On the backend, I'm proficient in using Express, MySQL, and PostgreSQL. I'm also skilled in interface design using Figma, with a focus on intuitive and engaging user experiences.

Skills

Frontend

- HTML
- CSS Frameworks
- Javascript
- Typescript
- React JS
- React Native
- Redux Toolkit
- Next JS
- Oauth (firebase)

Backend

- Express
- RESTful API
- MySQL
- PostgreSQL
- Redis
- RabbitMQ
- Payment Gateway (midtrans)

VCS

- Git & Github

UI/UX

- Figma
- Adobe

Work Experiences

- Dormitory Teacher at IDN Boarding School
(June 2022 - July 2023)
 - Coordinating in an Islamic Development Network Boarding School as a Dormitory Teacher for 10th-grade Senior High School students.
 - Monitoring the children's progress, health, and daily activities while they are in the boarding school
 - Acting as an intermediary for communication between the children and their parents while they are at the boarding school.
- Freelance Graphic Designer
(July 2020 - July 2021)
 - Layouting the textbooks for Al Hikmah Putra Junior High School, Cirebon.
 - Creating and publishing a storybook titled 'The Meaning of a Father.'

Circle web application

Circle is an innovative social platform that connects users through interactive threads enabling the sharing of text and images. With features akin to Twitter, users can freely create, browse, like, and respond to threads from other users. Circle enables users to connect, search, and follow relevant content, fostering a diverse and strongly interconnected social network

Stack:

Client / Frontend :

- React
- Redux toolkit
- Typescript
- styling with Chakra UI

Server / Backend :

- Express
- Typescript
- TypeORM
- Redis
- RabbitMQ
- PostgreSQL

WHATW

Mobile Game Trivia Multiplayer

I'm the driving force behind the exhilarating experience of WHATW, the captivating multiplayer trivia game. As a Frontend Developer, I don't just design an awe-inspiring user interface; I ensure every tap on the screen sparks joy. With the integration of Firebase for seamless logins, socket.io for real-time gameplay thrills, and Midtrans integration for purchasing avatars and diamonds, I've contributed to crafting an addictive gaming experience. Feel the tension and speed in multiplayer matches where quick answers mean everything. Alongside the team, we've created an engagingly competitive atmosphere, making WHATW an unforgettable place for trivia enthusiasts and knowledge seekers.

Stack:

Client / Frontend :

- React Native
- Redux toolkit
- Typescript
- styling with Glustack UI
- Socket IO
- Oauth (firebase)
- Midtrans

Server / Backend :

- Express
- Golang
- GRPC
- Laravel
- PostgreSQL
- Restful API
